

Association of Polish Engineers in Canada - Montreal Branch

invites members to lecture in a series of
Continuing Professional Development

Electrical systems – houses and industrial plants

1. Power consumption by application
2. Existing standards
3. Typical one line schematics
4. Electric power generation and power cost

The lecture will be held in English

**1 marca 2017 godzina 18:30 do 21:30. w biurze Strudes Inc. 1440
Ste-Catherine Ouest, Suite 905**

The lecture is intended for those who have no knowledge in the field of electrical engineering and will be led by Andrew Denasiewicz, Eng. EPV.

Students will receive the text of a lecture in English and a certificate of participation in the lecture.

Lectures from the cycle of Continuing Professional Development are free for members of the Association of Polish Engineers in Canada. Annual contributions are \$ 40. Persons who do not have technical education, may also be members of the Association.
